## Professional Summary

Results-oriented professional with a background in Mechatronics Engineering and practical experience in business development, client relationship management, and service-based sales through a family-owned real estate business.

Experienced in understanding customer requirements, communicating solutions, handling client inquiries, negotiation, and maintaining long-term professional relationships. Strong ability to identify customer needs, provide value-based solutions, and support business growth through effective communication.

Additionally experienced in software development environments, allowing effective communication with both technical and non-technical stakeholders.

## Professional Experience

**Business Development & Client Relationship Executive**
*Family Real Estate Business* *Dhaka, Bangladesh*

- Supported business development activities by identifying potential clients, understanding their property requirements, and recommending suitable solutions.
- Managed client communication through phone calls, meetings, and follow-ups to build and maintain strong professional relationships.
- Assisted in client acquisition, negotiation discussions, and converting customer inquiries into potential business opportunities.
- Explained service offerings, pricing information, benefits, and value propositions clearly to clients.
- Handled customer questions, concerns, and objections professionally while ensuring a positive customer experience.
- Coordinated with internal teams and stakeholders to ensure smooth service delivery and customer satisfaction.
- Maintained client records and tracked communication activities to support business development operations.

**Software Developer Intern** **August 2025 - September 2025**
*Itransition Group* *Remote*

- Collaborated with international teams in a software development environment, strengthening professional communication and remote collaboration skills.
- Assisted in developing backend services using ASP.NET Core and C# while understanding client-oriented software solutions.
- Built and tested RESTful APIs and worked with Entity Framework Core for database operations.
- Participated in debugging, documentation, code reviews, and continuous improvement activities.
- Developed structured problem-solving skills through technical troubleshooting and system analysis.

**Industrial Intern** **March 2023 - April 2023**
*Bangladesh Industrial Technical Assistance Center* *Tejgaon Industrial Area, Dhaka*

- Gained practical exposure to industrial machining processes including manual lathe, CNC lathe, milling, and shaper operations.
- Developed understanding of manufacturing processes including casting, forging, and heat treatment.
- Practiced basic PLC programming and industrial automation concepts.

## Education

**Bachelor of Science in Mechatronics Engineering** **2025**
*Rajshahi University of Engineering & Technology* *Rajshahi, Bangladesh*

Studied multidisciplinary engineering concepts including mechanical systems, electronics, electrical systems, automation, control systems, sensors, and industrial problem-solving.

## Engineering Project

**Design, Optimization, and Development of Vertical Axis Wind Turbine**
*BSc Thesis Project* *RUET*

- Designed and developed a low-cost vertical axis wind turbine optimized for low wind speed conditions.
- Applied CAD modelling, CFD simulation, optimization techniques, and prototype development using Fusion 360 and ANSYS.
- Improved design efficiency by reducing material usage while maintaining structural integrity.
- Developed strong analytical, problem-solving, and project management skills through engineering research.

## Skills

**Business Development:**

Client relationship management, lead generation, customer communication, requirement analysis, negotiation, sales support, follow-up management, service presentation.

**Communication:**

Professional phone communication, email communication, client handling, presentation skills, objection handling, problem solving.

**Technical Skills:**

ASP.NET Core, C#, REST APIs, Python, MATLAB, SolidWorks, Fusion 360, AutoCAD, ANSYS, Arduino, PLC programming.

**Software Tools:**

Microsoft Office, CRM systems, technical documentation, remote collaboration tools.
